SUMMARY

Results-driven Backend Developer and Team Lead with 5+ years of experience building scalable web applications and APIs using PHP and Laravel. Proven track record of delivering diverse platforms including e-commerce, ride-hailing, real estate, and service provider applications. Experienced in leading backend teams, designing system architecture, and optimizing application performance through caching strategies, query optimization, and search engine integration. Skilled in integrating complex third-party services including multiple payment gateways. Passionate about clean code, mentoring junior developers, and driving technical excellence across teams.

PROFESSIONAL EXPERIENCE

Backend Laravel Team Lead | QeemaTech

May 2026 – Current

- Leading a team of **backend Laravel developers**, overseeing task distribution and delivery
- Designing project architecture and establishing coding standards across the team
- Conducting regular **code reviews** to ensure quality and consistency
- Mentoring and upskilling junior developers through guidance and hands-on support

Backend Developer | QeemaTech

May 2025 – Apr 2026

- Developed diverse platforms including **service provider apps**, **social platforms**, and **multi-vendor e-commerce** solutions (both from scratch and script-based)
- Built an **Uber-like ride-hailing application** backend
- Integrated multiple payment gateways: **Mollie**, **Tabby**, **Tamara**, **myFatoorah**, **OneCard**, and **LikeCard** for digital products
- Worked within a team environment while independently owning multiple projects end-to-end

Full Stack Developer | Anubis Appz

May 2023 – Apr 2025

- Developed **e-commerce platforms** and **real estate applications** for property listing, buying, and selling using Laravel & Blade.
- Built a **course management system** for educational companies
- Integrated payment gateways including **Fawry** and **PayMob**
- Collaborated with cross-functional teams on multiple projects while independently owning others end-to-end

Full Stack Instructor | Function Training

Sept 2022 – Dec 2025

- Delivered full-stack development courses covering **Laravel** (backend) and **React** (frontend)
- Taught core concepts including MVC architecture, RESTful APIs, database design, and component-based UI development.

- Developed corporate websites for service and product showcasing using **Laravel & Blade**
- Built two **car services applications** with full backend logic and API integration using Laravel
- Developed a **multi-vendor e-commerce platform** using **Laravel & Bagisto**, handling product management and vendor workflows
- Built an admin panel using **Filament** for one of the service applications

EDUCATION

AIN SHAMS UNIVERSITY

2019 - 2023

Bachelor of Science in Science – physics and cs

TECHNICAL SKILLS & ADDITIONAL

Languages & Frameworks: PHP, Laravel, Filament, React, Blade.

Databases: MySQL, Redis.

Infrastructure: Linux, Nginx, cPanel, VPS, Git, Docker.

Search & Queues: Meilisearch, Laravel Queues, Laravel Horizon

Real-time: Laravel Reverb, WebSocket, Firebase FCM

APIs: REST APIs, Payment Gateways (Fawry, Paymob, Mollie, Tabby, Tamara), Digital Products Providers (OneCard, LikeCard)
